

# Manufacturers and Models for New Qualified Clean Vehicles Purchased in 2022 and Before

If you bought a new, qualified plug-in electric vehicle (EV) between 2010 and 2022, you may be eligible for a [new electric vehicle tax credit](#) up to \$7,500 under Internal Revenue Code Section 30D.

Manufacturers of the vehicles listed below have provided appropriate information and have received our acknowledgement that the vehicles are eligible for the credit and the amount of the qualifying credit.

The listing below also indicates whether credits for a manufacturer's vehicles have phased out because at least 200,000 qualifying vehicles it manufactured have been sold for use in the United States (determined on a cumulative basis for sales after December 31, 2009). For additional information see Notice 2009-89.

## Vehicles Purchased in 2022 After August 16, 2022: Extra Requirement

Vehicles purchased between August 17 and December 31, 2022, must also have undergone final assembly in North America to qualify for the credit. To see if a specific vehicle meets the final assembly requirements:

- Note the vehicle's Vehicle Identification Number (VIN)
- Go to the Department of Energy's page on [Electric Vehicles with Final Assembly in North America](#) 
- Use the VIN Decoder tool under "Specific Assembly Location Based on VIN"

For [vehicles purchased in 2023 or later](#), manufacturers must qualify under a different process put in place by the Inflation Reduction Act of 2022.
